用户登录和首页

1. 当用户扫描二维码或点击打开微信小程序时候,小程序启动运行时候会判断当前链接中是否有 `shareUserId` 该查询参数(query),如果有shareUserId,则发出请求,绑定上级

`/app.js` line:82

```
  onShow: function(n) {
    // n.query = (0, util.getOptions)(n.query); // util.getOptions(n.query) || 0
    n.query=util.getOptions(n.query) || 0;
    wx.removeStorageSync("newShopCarList");
    var shareUserId = n.query.u || n.query.s || 0;
    // shareUserId > 0 && (wx.setStorageSync("shareUserId", shareUserId), (0, t.bindShareId)(sha
    if(shareUserId>0){
      wx.setStorageSync('shareUserId', shareUserId);
      shareUtils.bindShareId(shareUserId);
    }
  },
```

/utils/shareUserUtils.js line:96

```
  var bindShareId = t(r.default.mark(function e(t) {
      var a;
      return r.default.wrap(function(e) {
          for (;;) switch (e.prev = e.next) {
            case 0:
              return a = {}, e.prev = 1, e.next = 4, n.default.GET(u.default.service.shareUserRi

            case 4:
              a = e.sent, e.next = 10;
              break;

            case 7:
              e.prev = 7, e.t0 = e.catch(1), a = e.t0;

            case 10:
            case "end":
              return e.stop();
          }
      }, e, void 0, [ [ 1, 7 ] ]);
  }));
```

2. 小程序默认页面是 /pages/relay/relay 从 /app.json 得知 页面进入时也会绑定分享用户id,有可能
   是两种不同的进入方式,走同一个分享接口

/pages/replay/replay.js line:83

```
onLoad: function (query) {
  query = u.getOptions(query ? query : {});
  this.setData({
    topic_id: e.num || 0,
    pickupId: e.pickup_id || 0,
    type_id: e.typeid || 0
  });
  wx.showLoading({
    title: "加载中..."
  });
  let a = this;
  o.default().then(t => {
    a.selfUserId = wx.getStorageSync("userid");
    a.userid = e.userid;
    if (a.userid && "undefined" != a.userid && a.selfUserId && a.setShareUser(),
      a.data.topic_id && a.data.pickupId) {
      this.setData({
        pickupName: f.globalData.pickup_name
      })
    }
    a.upDateAddressApi(), void a.pageInit();
    a.getPopData();
  })

},

setShareUser: function () {
  var t = this;
  return e(r.default.mark(function e() {
    var a;
    return r.default.wrap(function (e) {
      for (;;) switch (e.prev = e.next) {
        case 0:
          return a = {}, e.prev = 1, e.next = 4, i.default.GET(n.default.service.shareUserRigh

        case 4:
          a = e.sent, e.next = 10;
          break;

        case 7:
          e.prev = 7, e.t0 = e.catch(1), a = e.t0;

        case 10:
        case "end":
          return e.stop();
      }
    }, e, t, [
      [1, 7]
    ]);
```

```
      }))();
  },
```

首页初始化时拉取必要信息

方法名	api
getRollImage	

```
  pageInit: function () {
  var t = this;
  return e(r.default.mark(function e() {
    return r.default.wrap(function (e) {
      for (;;) switch (e.prev = e.next) {
        case 0:
          if (t.data.topic_id || f.globalData.topic_id) {
            e.next = 7;
            break;
          }
          return t.setData({
